DETAILED ACTION

Prelim./Amdt.

1. Receipt is acknowledged of the Amendment filed 06/09/2005.
2. Applicant cancelled claims 2-3, 11, 16 and 26-29.
3. Claims 1, 4-10, 12-15, and 17-25 are pending.

Allowable Subject Matter

4. The indicated allowability of claims 6-7, 15, 17, 19, and 21 is withdrawn in view of the newly discovered reference(s) to Ookawa et al. (US 6,628,460 B1). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 6-7 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Ookawa et al. (US 6,628,460 B1).

Re claims 6-7 and 19: Ookawa discloses an optical substrate having a prism structure characterized by a peak angle in the range of 80 degree to 100 degree (col. 5, line 58) and a refractive index of 1.6 or more (col. 5, line 65). Further, Ookawa discloses that the ultraviolet

curable material composition is supplied in the prism structure in order to prevent a bubble generation (col. 2, line 35+).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 8-9, 12-13, 15, 17, 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ookawa in view of Higuchi et al (US 5,797,668) and Lu (US 2002/0097496 A1).

Re claims 8-9, 12-13, 15, 17, and 20-21: Ookawa's teachings have been discussed above.

Ookawa discloses the peak angle range of the prism and the refractive index as set forth in the claim. Ookawa does not disclose that a cross section of the prism structure have a curved facet or a plurality of facets. Higuchi discloses a prism structure having a curved facet (Fig. 17 and Fig. 18), and Lu discloses a prism structure having a plurality of facets (Fig. 6). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Ookawa's prism structure to include a curved facet or a plurality of facets as Higuchi and Lu showed because such modification of prism structure make it possible to control and redirect propagation direction of the light and such modification would be within the level of ordinary skill in the art.

Allowable Subject Matter

9. Claims 1, 4-5, 18 and 22-23 are allowed.
10. Claims 10, 14, and 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
11. The following is a statement of reasons for the indication of allowable subject matter:
With regard to claims 1, 4-5, 10, 14, 18, 22-25, the prior art of record does not disclose the claimed optical substrate having a prism structure characterized by a cross section having a curved facet described by the equation as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
